## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Election/Restriction**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22 are drawn to a method of in vitro cultivation of *Polygonatum*, classified in class 435, subclass 431.
- II. Claims 23-40 are drawn to a kit of medium, classified in class 47, subclass 66.7.
- III. Claims 41-56 are drawn to a method of in vitro induction of germination, classified in class 435, subclass 420.
- IV. Claims 57-70 are drawn to a method of epicotyl dormancy release, classified in class 47, subclass 58.1.
- V. Claims 71-84 are drawn to a method of in vitro for release of epicotyl dormancy from differentiated de novo axillary bud, classified in class 435, subclass 430.

The inventions are distinct, each from the other because:

Inventions II and I, III-V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the medium of Invention II can be used to culture other plants species. Inventions I and III-V are distinct, each from the others, because the methods require different starting materials and methods steps to achieve divergent ends. No method would render any of the others obvious, and different searches would be required for each. The inventions are deemed patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and a different search is required for the two groups, restriction for examination purposes as indicated is proper. Applicant is advised that

Art Unit: 1661

the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
